# Touch-free flush plates

We introduce our new touch-free flush plates NIGHT LIGHT, the winner of the international competition iF Design Award 2018 in the Product category of the Bathrooms section. Three design variants and sophisticated system of backlight settings and other parameters enables a unique look to any bathroom or toilet.

**Barbora Škorpilová**  
Architect, designer and the creator of the FLAT flush plates, NIGHT LIGHT and M370–M475 for Alcaplast, Barbora is today known for her association with the MIMOLIMIT studio which she founded in 2001.

# Flush plates FLAT

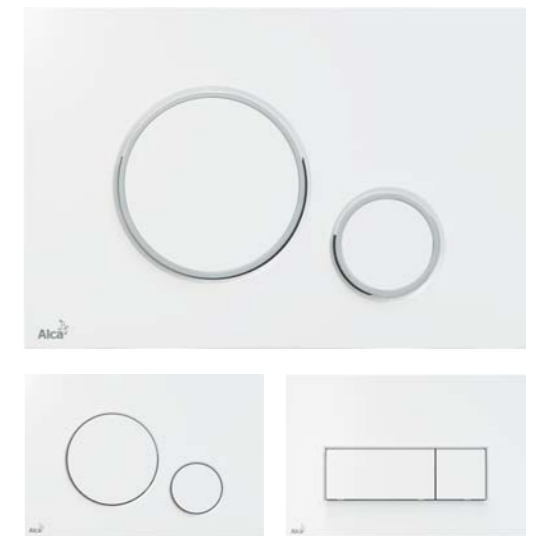

reddot award 2014  
winner

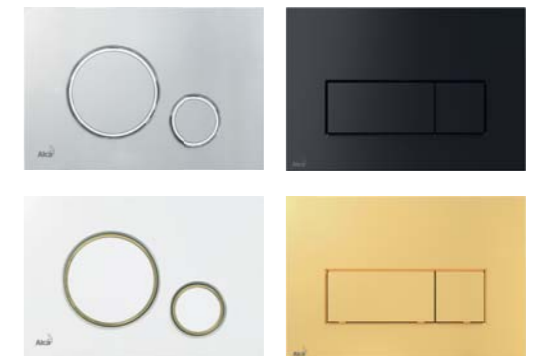

Elegant and beautiful – this is the right characteristic of the flush plates FLAT. They were designed for the most demanding customers. They meet the demands of modern interior design by their original and clean lines which match the other elements in the bathroom. The mechanism is fully recessed into the wall, so the flush plate effectively merges with the surrounding tiles. The plate itself is made of brushed metal, on which fingerprints are not visible. Furthermore, the FLAT flush plates are fully compatible with all our ALCA pre-wall installation systems. Flush plates FLAT won in a prestigious product-design competition Red Dot Award 2014.

# Flush plates THIN

# WC seats

## SOFTCLOSE system – Slow closing WC seat cover

The SOFTCLOSE system is characterised by its slow seat closing action. The mechanism within the hinges of the WC seat ensure a smooth and quiet closure onto the ceramics. A big advantage of this system is to protect the WC pan from damage caused by accidental dropping of the seat. It also ensures greater safety and comfort for the user when handling the seat. It is particularly suitable for public areas and for families with children.

## Antibacterial

The majority of ALCA toilet seats have antibacterial properties. The Antibacterial properties are achieved by the Silver compounds within the material. Testing has proven that the bacterial density on the WC seat surface is reduced.

## Duroplast

Toilet seats made of high-quality Duroplast material will satisfy even the most demanding Customers. Duroplast material greatly reduces discomfort of sitting on a cold surface of a WC seat.

## CLICK system for easy cleaning

CLICK system on WC seat hinges allows for easier and faster cleaning of the WC pan and seat itself. The seat is released from the pan by pressing the two buttons on the inner side of the seat hinges, allowing it to be lifted clear for cleaning. The seat is easily and quickly returned to its original position by pressing it back onto the hinges.

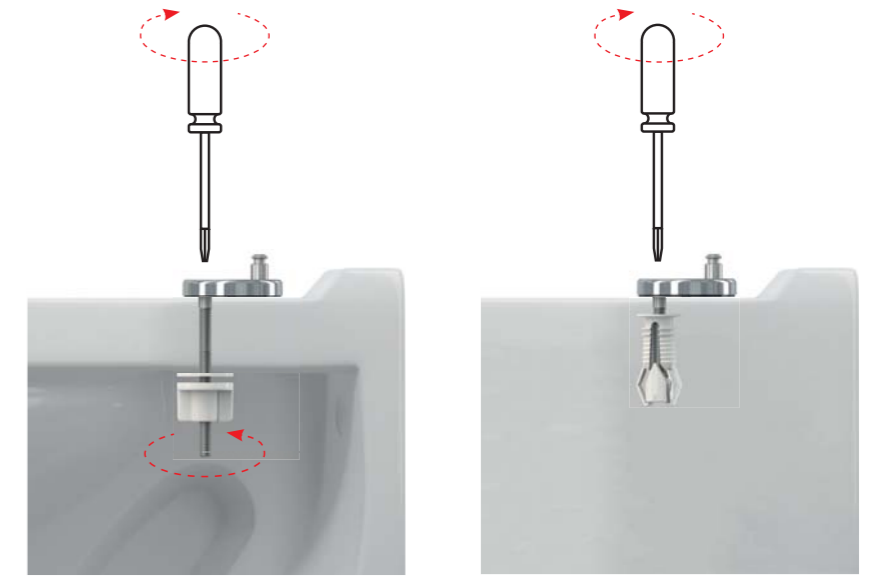

## Setting of hinges for perfect compatibility

Easy mounting of ALCA seats onto the WC pan is guaranteed thanks to the large range of possible adjustment of the seat hinges. This together with the shape of the WC seats enable them to be fitted to many types of ceramics. The hinges are made of stainless steel and are white powder paint coated to blend them into the ceramic surface, this also ensures long life and durability.

## Comfortable top mounting

For Duroplast seats with CLICK system we offer an alternative to the classic bottom mounting hinges. Designed for toilet bowls with limited access the hinge system can be mounted and tightened from the top surface only, eliminating the need to gain access from below.

## The integrated seat insert with magnetic holder

Duroplast seats A603 and A606 are equipped with a fully integrated infant potty seat insert. It is attached to the hinge pins and can be easily removed. The insert is made of lightweight polypropylene material so that a child can safely and simply manipulate the seat. When not use the potty seat insert is retained magnetically by the seat cover allowing normal adult use.

## Coloured seats and seats with printing

Duroplast seats A601 and A604 come as standard in four colours – white, bahama, pergamon and pistachio. We also offer WC seats with colour printing in three themes – flower, shell and zen.

## Shower drain APZ15 Marble

The new generation of stainless steel shower drains APZ15 is aimed especially for design fans. The water is drained by two slots in the pavement of the bathroom that hides the stainless steel shower drain without edges. The view is not optically disturbed by the stainless steel edge neither on the grid nor on the shower drain. Naturally functioning secondary drainage will ensure outflow of moisture under the pavement back into the shower drain body.

#### Advantages of the shower drain:

- Design shower drain is suitable for any paving thickness and for large format natural stone boards
- Water drainage is ensured by the slot in the pavement
- Uniform floor surface in the bathroom is achieved by the innovative shower drain and grid construction without edge
- The upper side of grid is covered with a special rough surface to ensure a safe bonding with the embedded tiles

**Determining the length of ALCA bath wastes**

Determining the necessary length of the bath waste for different bathtub models is very easy. The waste hole in the bottom of the tub and an the overflow opening in the wall of the tub are combined perpendiculars (Hmax and H2). By adding the perpendicular lines, then we get the desired waste length (L).

$H_{max} + H_2 = L$

Maximum bathtub wall thickness for each type of bath waste and trap
